

## What is BFET sm?

1- BFET token has been built on Binance Smart chain network. BFET is designed to provide a high-performance and effective services in its social media platforms:

#1-Fooshia social media platform (online), #2 Let me clip app (online), #3 BFET-tube platform (under development).

All three platforms will have:

#1- The ability to exchange digital currencies. #2- Accept payment in digital currencies for advertisements. #3- Reward content creators with cryptocurrency and BFET of course.

2- BFET as the first token to enter the field of social media, to provide solutions that the current means of communication have not been able to solve so far. It provides the world with a decentralized social media platform, which can share profits with holders of BFET tokens and is not subject to government policies.

3- BFET has been launched as a utility token in BFET Ecosystem, an innovative social media platforms that addresses the needs of generation Z. This younger generation of social media users seeks a platform that addresses both their needs as early crypto adopters as well as their evolving needs in social media.

4- BFET is a reflection token, and this means every transaction on BFET has 1.5% transaction fee, the 1% will be redistribute automatically between BFET holders. And 0.5% will go to a specific wallet to use to support the influencers people on BFET's network platforms to be more influential in their country or community.

**In simple words:** if you transfer 100 BFET to another one he will receive 98.5 BFET and the rest 1.5 BFET will be redistributed as described above.

### **Our Mission:**

Is to "Lift BFET network to New Heights" by offering investors an innovative, user-friendly, one-stop- Social media platforms to find everything they need to not only locate a new token about to launch, but also to give every person in the world an equal chance to manage and improve their financial security.

We know that this mission may seem at first glance very difficult, but we believe that it is not impossible. If we proceed with it at a consistent and successive pace, to make BFET sm platforms the first network in the world in the field of digital marketing and advertising and a major incubator environment for cryptocurrencies.
